CAREER OBJECTIVE

Computer Science undergraduate seeking an entry-level AI Engineer opportunity to apply Python, machine learning, Generative AI, LLMs, and problem-solving skills. Hands-on experience building AI-powered applications, integrating APIs and databases, and developing practical intelligent solutions.

EDUCATION

DRK College of Engineering and Technology, Hyderabad **2027**
B.Tech – Computer Science and Engineering *CGPA: 8.14*

Sri Chaitanya Junior Kalasala **2023**
Intermediate – MPC, Telangana State Board of Intermediate Education *Score: 9.24*

Eves High School **2021**
Secondary School Certificate (SSC) – Telangana Board of Secondary Education *CGPA: 9.0*

TECHNICAL SKILLS

Programming: Python, Java, OOP, Data Structures & Algorithms
AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, Computer Vision
LLM & GenAI: RAG, Prompt Engineering, LLM APIs, Ollama
Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, Ultralytics YOLO
AI Development: FastAPI, REST APIs, API Integration
Tools & Cloud: Git, GitHub, Jupyter Notebook, VS Code, Postman, AWS

INTERNSHIPS

Python Programming Intern – Beeskilled **Jul 2026 – Sep 2026**

- Completed practical Python programming assignments involving programming logic, debugging, and project-based problem solving.
- Applied Object-Oriented Programming and structured programming concepts to strengthen code organization and software development practices.

1M1B Green Internship – AICTE & Salesforce **Feb 2026 – Mar 2026**
Certificate

- Completed 60 hours of learning and live project work focused on developing a sustainable mindset and practical project experience.
- Worked on a sustainability-focused project using Tableau and full-stack development concepts.

AI for Sustainability Virtual Internship – 1M1B & AICTE & IBM SkillsBuild **Dec 2025 – Jan 2026**
Certificate

- Gained practical experience in Artificial Intelligence, Responsible AI, and key sustainability concepts aligned with the UN Sustainable Development Goals.
- Explored Generative AI and RAG systems for real-life problem solving and impact-driven applications.

PROJECTS

AgriPath AI – AI-Powered Smart Farming Platform Live | GitHub

- Built an AI-powered smart farming platform supporting crop recommendation, plant disease detection, fertilizer guidance, weather information, market information, and AI-assisted agricultural support.
- Integrated machine learning models, computer vision, LLM services, APIs, and database services to deliver practical smart-farming capabilities.
- **Technologies:** Python, Scikit-learn, YOLO, OpenCV, TensorFlow, PyTorch, Supabase, LLMs, APIs, Ollama.

Eventify – Event Management & Ticket Booking Platform Live | GitHub

- Engineered a full-stack event management platform supporting event creation, publishing, discovery, organizer management, and online ticket booking.
- Configured database-driven event workflows, ticket management, user functionality, QR-based ticketing, and responsive web interfaces.
- **Technologies:** Python, Django, MySQL, HTML, CSS, JavaScript.

QuickFixr – On-Demand Skilled Worker Platform Live | GitHub

- Built a service platform connecting users with skilled workers for local services including borewell repairs, home maintenance, and other repair requirements.
- Designed responsive interfaces and dynamic JavaScript interactions to support service discovery and user engagement.
- **Technologies:** PHP, HTML, CSS, JavaScript.

ACHIEVEMENTS

- **Winner** – SummerSaaS AI Hackathon 2026, Centle Group, BITS Pilani Hyderabad Campus.
- **Top 20 Finalist – UNLEASH LLM Innovation Challenge 2026** Certificate
- **Semi-Finalist** – ET-AI Hackathon 2026, The Economic Times.

LEADERSHIP

AWS Student Builder Campus Leader (SBCL) – Amazon Web Services **Sep 2026 – Present**

- Led student engagement around AWS learning opportunities and Builder Center activities through technical community outreach.
- Facilitated student participation in AWS resources, learning initiatives, and community programs.

CERTIFICATIONS

- **Agentic AI Bootcamp: Build with ADK, Deploy on Google Cloud – JNTUH.**
